WELCOME TO NAPLES

The European Control Conference is the annual conference promoted by the European Control Association and is intended to provide a stimulating environment for the productive exchange of ideas and developments in the area of systems and control and their applications. **ECC19 will take place in Naples, “the city of the sun”**. With over 1 million inhabitants, 5 Universities and several research centres, Naples is the third largest Italian city. It hosts one of the oldest Universities in the world, the University of Naples Federico II founded in 1224. Its control group is the organizer of the conference in collaboration with the control group at the younger University of Sannio in Benevento which was founded in 1994.

The area is characterised by the presence of several high-tech companies involved with control applications in different engineering fields such as automotive, railway, aerospace, electronics, food. 

Naples is a fascinating city close to world renowned touristic sights such as the ancient town of Pompeii, the islands of Capri and Ischia, the Mount Vesuvius volcano.

Naples has a large international airport and is connected frequently by high speed trains to Rome (1h 10min), Florence (2h 50min) and Milan (4h 20min).
